SUMMARY

Data Analyst with 2+ years of experience in SQL, Python, Power BI, Excel, and Business Intelligence. Skilled in data cleaning, EDA, dashboard development, KPI reporting, and transforming complex datasets into actionable business insights. Experienced in financial and collections analytics with a strong focus on data-driven decision-making.

TECHNICAL SKILLS

Programming and Querying: Python, SQL (Advanced – Joins, Window Functions, CTEs, Subqueries, Aggregations)

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn

Data Visualization: Power BI, Tableau, Excel (Advanced)

Databases: MySQL, PostgreSQL

Concepts: Data Analysis, Data Cleaning, EDA, Statistical Analysis, Hypothesis Testing, A/B Testing, Web Scraping

PROJECTS

Financial Operations Analytics | [Project Link](#)

- Skills: Python, Pandas, Scikit-learn, Prophet, Statsmodels
- Built a revenue forecasting model using ARIMA and Prophet to predict 12-month revenue trends
- Developed churn prediction model using Logistic Regression and Random Forest achieving 75 Percent + accuracy
- Performed customer segmentation using RFM analysis and K-Means clustering
- Applied data preprocessing, feature engineering, and EDA to clean and transform financial transaction data

Retail and Marketing Analytics | [Project Link](#)

- Skills: Python, Pandas, NumPy, Scikit-learn, SciPy, Matplotlib, Seaborn, Plotly
- Analyzed 10K+ retail transactions to uncover sales patterns, seasonality, and customer behavior
- Applied K-Means clustering to create four customer segments for targeted marketing strategies
- Calculated Customer Lifetime Value (CLV) to identify high-value customers and improve ROI
- Created KPI framework including retention rate, AOV, and revenue trends for business monitoring

Healthcare Analytics – Hospital Readmission Prediction | [Project Link](#)

- Skills: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SQL, Power BI
- Developed a predictive model to identify patients at risk of 30-day hospital readmission
- Conducted EDA to analyze patient demographics, diagnoses, and treatment trends
- Evaluated models using a confusion matrix, recall-focused metrics, and statistical analysis

WORK EXPERIENCE

DATA ANALYST — CREDHAS TECHNOLOGY PRIVATE LIMITED Jan 2024 – June 2026

Payroll: Big Tree Resource Management Pvt. Ltd.

- Skills: Python, SQL, Excel, Power BI
- Analyzed large-scale loan collections and borrower datasets to identify trends and support data-driven business decisions.
- Extracted, cleaned, and transformed data using SQL and Excel, ensuring data accuracy and reliability for reporting.
- Developed 10+ Power BI dashboards tracking recovery rate, collection efficiency, and agent productivity KPIs.
- Performed Exploratory Data Analysis (EDA) to uncover borrower behavior patterns, portfolio risks, and operational improvement opportunities.
- Generated 20+ weekly and monthly MIS reports supporting management decisions across collections and operations teams.
- Collaborated with cross-functional teams (Operations, Collections, and Management) to convert business requirements into analytical solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Dr. A. P. J. Abdul Kalam Technical University (AKTU)

Graduated: 2024

Lucknow, Uttar Pradesh
